

ORGAN DAMAGE

- Liver and/or kidney damage
- Leg and/or mammary gland swelling

IMMUNITY

- Increased susceptibility to diseases
- Decreased response to vaccinations
- Repeat health treatments

REPRODUCTION

- Altered heat cycles
- Poor conception rates
- Agalactia/reduced milk production
- Prolonged gestation, dystocia, retained placenta
- Embryonic mortality and abortion
- Poor sperm quality

PERFORMANCE

- Reduced growth rates of foals
- Lethargy

GUT HEALTH

- Feed intake reduction or refusal
- Damage and lesions to the intestinal tract
- Altered gut microbial functions
- Inconsistent manure quality
- Increased gut pathogens

Altech® MYCOTOXIN MANAGEMENT

MYCOSORB A+®

MYCOSORB A+* reduces mycotoxin absorption, negating the damaging effects of mycotoxins on the health and performance of animals.

- A proven, broad spectrum mycotoxin binder, which tackles mycotoxin challenges as a whole rather than dealing with individual mycotoxins
- Fast acting, interacts with mycotoxins within 10 minutes
- Effective at a low inclusion level
- Proven by scientific research
 - 159 peer reviewed published studies
 - 109 published in vivo trials
 - 22 published in vitro mode of action trials

MYCOSORB A+*, from ALLTECH*, offers producers a solution that limits the effect of more mycotoxins than ever before.

The graph on the right shows the risk associated with mycotoxin contamination in a particular feed sample with and without MYCOSORB A+°.

TAKE THE MYCOSORB A+® CHALLENGE

Feeding rates based on mycotoxin risk and age/performance status

Foals 4 - 8 g/head/day 5 - 15 g/head/day Performance 10 - 20 g/head/day Breeding

Alltech's Mycotoxin Management Program is designed to reduce risk while improving performance and profitability for individual animals. Actual results may vary. Program response and ROI will depend on specific farm scenarios.
